①

To do today!

→ ~~implement the lower-mass limit determination scheme for~~  
~~Pout/Tout/Gout & Rout/Mout in the sandbox code~~

→ ~~test & debug it.~~ ← got to here before leaving...  
test & debug.

→ ~~move the address calcs into their own subroutine (& make a header~~  
~~check that the main C++ code is <sup>fully</sup> archived on ~~Bitbucket~~ <sup>Bitbucket</sup>~~

→ ~~copy over Sandbox/src to the main C++ code staging~~  
~~area/directory.~~

→ ~~update the <sup>Bitbucket</sup> ~~archive~~ archive once that's done.~~
